SUMMARY

Computer Science student with a strong interest in Blockchain Development and Web3 technologies. Skilled in Python, JavaScript, SQL, and Solidity, with hands-on experience building smart contracts and blockchain-based projects using Remix IDE and MetaMask. Familiar with HTML, CSS, and GitHub, with a focus on developing practical projects and continuously improving software development skills.

EXPERIENCE

Python Programming Intern Jun 2026 – Jul 2026

NIT Jamshedpur

- Completed an internship at NIT Jamshedpur, working on a Student Dropout Prediction project using Machine Learning and Python. Gained practical experience in data processing, model development, and applying machine learning techniques to analyze stude

PROJECTS

Blockchain Voting System | github.com/Rehan-Code764/Python_Cryptography_Blockchain_Projects

- Developed a Blockchain Voting System using Python to maintain a tamper-resistant voting record. Implemented voter identification, candidate registration, vote casting, and SHA-256 hashing to link blocks and maintain blockchain integrity.

ERC-20 Token Development | github.com/Rehan-Code764/Solidity_Project

- Developed and deployed a custom ERC-20 token named PRT (Proity) using Solidity and OpenZeppelin on the Sepolia testnet. Integrated the token with MetaMask and tested token transfers to understand token standards and blockchain transactions.

EDUCATION

Jharkhand University of Technology Sep 2024 – Present

Diploma in Computer Science and Engineering

SKILLS

Technical Skills: Python, JavaScript, SQL, Solidity, HTML, CSS, Smart Contracts, Java, ERC-20, Remix IDE, MetaMask, Git, GitHub.

Soft Skills: Communication, Teamwork, Problem Solving

CERTIFICATIONS & LANGUAGES

Certifications: Machine Learning Internship Certificate — National Institute of Technology (NIT), Jamshedpur, Blockchain Development Course — Tutedude

Languages: English, Hindi
